

**'INTELLIGENT' PRESSURE AND LEVEL TRANSMITTERS**

**For all industries**

## Series 4000

- All stainless steels
- High accuracy sensor technology in steel
- Integral display and output
- Accuracy  $\pm 0.1\%$
- 4-20mA or
- Analog output with current and voltage
- Output relay
- Temperature and pressure compensation
- Integral transmitter calibration
- Accuracy accuracy  $\pm 0.1\%$
- Integral stainless steel
- All stainless steel components
- Integral stainless steel

### Description

Series 4000 is a range of highly sophisticated transmitters for pressure and level measurement. They combine ruggedness, accuracy and reliability with a wide range of options, types of output and features. The Series 4000 is a rugged and reliable transmitter for all types of applications. It is available in a range of stainless steel and titanium materials to suit the most demanding applications. The Series 4000 is a highly accurate and reliable transmitter for all types of applications.
