

## Universal, Versatile Flow Liquid Flow Meter

- Accurate, continuous measurement for fluids 0.01 to 2000 gpm
- Easy to install flow meter with no need for straight pipe before or after the meter. No need for 10 diameters of straight pipe.
- Measures in temperature and pressure. All units are easily changed.
- Operates in ambient or high temperature.
- Operates in 100% humidity and in high salt air.
- Operates in 0% humidity.
- No moving parts or wear parts.
- No need for calibration.
- No need for maintenance.
- No need for electrical power.
- No need for electrical power.
- No need for electrical power.
- No need for electrical power.
- No need for electrical power.
- No need for electrical power.

# InnovaSonic 200

The InnovaSonic 200 is a universal, versatile flow meter that can measure the flow of any liquid. It is easy to install and use, and it can be used in a wide range of applications. The InnovaSonic 200 is a flow meter that can measure the flow of any liquid. It is easy to install and use, and it can be used in a wide range of applications.

The InnovaSonic 200 is a flow meter that can measure the flow of any liquid. It is easy to install and use, and it can be used in a wide range of applications.
