

Model: 1000000
Max. Working depth: 100 mm
Max. Working angle: 120° min.

All activities involving the use of a hand tool are likely to be classified as light or medium work, depending on the frequency and duration of use. A hand tool should not be used as a substitute for a machine, and therefore, the manufacturer should provide an early warning on each page of the manual to help the user to identify the intended limits and to use proper judgement.

The design of the tool may vary, and therefore, always use the correct version. Some functions are suitable for both the screw bit version and the straight bit version. However, a safety consideration is the fact that the use of a straight bit is not recommended, especially in a horizontal position.

EMERGENCY STOP SYSTEM (E-STOP) is not available on this model.

The manufacturer must be contacted for information on the correct use of the hand tool. Please refer to the manual before use.

Do not use the tool as a

Using extension

The extension may be used. Please refer to the manual for details. Do not use the extension as a substitute for a machine, and therefore, the manufacturer should provide an early warning on each page of the manual to help the user to identify the intended limits and to use proper judgement.

The product is designed for use in accordance with the instructions provided in the manual. The manufacturer is not liable for damage or injury resulting from the incorrect use of the product. Please refer to the manual for details. The manufacturer is not liable for damage or injury resulting from the incorrect use of the product. Please refer to the manual for details.
