Part No.	Part Name	Part No.	Part Name
100-100-011	TRANSFORMER	100-100-012	TRANSFORMER
100-100-013	TRANSFORMER	100-100-014	TRANSFORMER
100-100-015	TRANSFORMER	100-100-016	TRANSFORMER

NOTES:
 1. This component is a transformer.
 2. The component is used in the power supply section of the circuit.
 3. The component is used in the power supply section of the circuit.

NOTES:

1. This component is a transformer.
 2. The component is used in the power supply section of the circuit.

1. This component is a transformer.
 2. The component is used in the power supply section of the circuit.

NOTES:

1. This component is a transformer.
2. The component is used in the power supply section of the circuit.
3. The component is used in the power supply section of the circuit.
4. The component is used in the power supply section of the circuit.

NOTES:

1. This component is a transformer.
2. The component is used in the power supply section of the circuit.

NOTES: This component is a transformer. It is used in the power supply section of the circuit. The component is used in the power supply section of the circuit.

1. This component is a transformer.
2. The component is used in the power supply section of the circuit.
3. The component is used in the power supply section of the circuit.
4. The component is used in the power supply section of the circuit.

NOTES: IDENTIFICATION

NOTES: IDENTIFICATION
 This component is a transformer. It is used in the power supply section of the circuit. The component is used in the power supply section of the circuit.

1. This component is a transformer.
2. The component is used in the power supply section of the circuit.
3. The component is used in the power supply section of the circuit.
4. The component is used in the power supply section of the circuit.
5. The component is used in the power supply section of the circuit.
6. The component is used in the power supply section of the circuit.
7. The component is used in the power supply section of the circuit.

NOTES:

1. This component is a transformer.
2. The component is used in the power supply section of the circuit.
3. The component is used in the power supply section of the circuit.
4. The component is used in the power supply section of the circuit.
5. The component is used in the power supply section of the circuit.
6. The component is used in the power supply section of the circuit.
7. The component is used in the power supply section of the circuit.
