

'INTELLIGENT' PRESSURE- AND LEVEL TRANSMITTERS

For all industries

Series 2000

- ALL-INDUSTRY DESIGN
- 100% SILICONES AND STAINLESS STEEL AVAILABLE
- 4-20 mA OUTPUT
- 0.1% OR BETTER ACCURACY
- 100% FIELD CALIBRATION
- 100% FIELD TUNING
- 100% FIELD ZEROING
- 100% TANK-TO-TANK
- 100% TANK-TO-TANK
- 100% TANK-TO-TANK

HART

Description

The Series 2000 is a complete range of intelligent pressure and level transmitters offering rugged and accurate performance for all applications. The transmitter comes in various designs - for corrosion resistant materials selected.

The Series 2000 can deliver accurate and stable readings with a choice of output frequency to meet the user's specific process requirements. The transmitter comes with a choice of output frequency of 0.1% or better. The transmitter is available in various materials and configurations.

The Series 2000 is a complete range of intelligent pressure and level transmitters offering rugged and accurate performance for all applications. The transmitter comes in various designs - for corrosion resistant materials selected.
