

INTELLIGENT PRESSURE AND LEVEL TRANSMITTERS

For all industries

Series 4000

- All stainless steel
- High accuracy sensor
- Compensation of zero
- Linear output and input
- Accuracy $\pm 0.1\%$
- 20mA output
- Remote output with
- Current and voltage
- Output channel
- Temperature and pressure
- Serial transmitter
- Industrial
- Accuracy accuracy $\pm 0.1\%$
- Linear accuracy feature
- All stainless steel construction
- Small footprint

Description

Series 4000 is a range of intelligent pressure transmitters for industrial applications. They offer high accuracy, linear output and compensation of zero. They are available in all stainless steel construction and offer a wide range of output options. They are also available with a remote output with current and voltage. They are also available with a serial transmitter for industrial applications. They are also available with a small footprint.
