

Turbine flowmeter HME / HMA-E

Application/Specifications

It is used to measure mass flow for flow media to be used in the chemical industry.
The turbine flowmeter offers high accuracy and excellent features.

Application/Specifications

It is used to measure mass flow for flow media and is designed for use in the chemical industry. It offers high accuracy and excellent features.

Application/Specifications

It is used to measure mass flow for flow media and is designed for use in the chemical industry. It offers high accuracy and excellent features.

Notes

The turbine flowmeter is designed for use in the chemical industry. It offers high accuracy and excellent features.

Specifications

It is used to measure mass flow for flow media and is designed for use in the chemical industry. It offers high accuracy and excellent features.

Flowing Media

The turbine flowmeter is designed for use in the chemical industry. It offers high accuracy and excellent features.
