

Climatic Independent Level Sensor LAR

Application Specifications

24-hour level measurement in open water
For large-scale water level measurement

Application examples

Water level measurement in open water
24-hour level measurement in open water
24-hour level measurement in open water
24-hour level measurement in open water

Key technology / Innovations

Special sensor technology for high accuracy
Automatic level measurement and data storage
Automatic level measurement and data storage
Automatic level measurement and data storage
Automatic level measurement and data storage

Sensor Storage

24-hour level measurement in open water
Automatic level measurement and data storage
Automatic level measurement and data storage
Automatic level measurement and data storage
Automatic level measurement and data storage
Automatic level measurement and data storage
Automatic level measurement and data storage

Technical details

Automatic level measurement and data storage
Automatic level measurement and data storage
Automatic level measurement and data storage

Advantages

Automatic level measurement and data storage
Automatic level measurement and data storage
Automatic level measurement and data storage
