

Product Information MAM 900-BAT, MAM 900-BAT

PHARMA

FOOD

Digital Pressure Gauge / Pressure Switch

Application

- Hygienic pressure measurement
- Compensated case or highest accuracy
- Largest display in a pressure gauge

Application examples

- Local display without external power supply
- Pressure control with two relays

Hygienic design / Process connection

- Hygienic process connection with CIP/CIP-2000
- Compendious 2 or 4-bore design (the version with 2BSC design)
- All wetted materials are FDA compliant
- All materials and processing 316L/316L surface
- Complete overview of process connections and wiring code
- The Anderson-Negele (A) Knowledge system offers a free operational, hygienic and easy-to-install installation solution for pressure

Features

- 0.2% / 0.5% accuracy up to 1.60 MPa absolute maximum
- IP 65 housing for optimum cleanliness
- 2 field compensation settings as standard
- Pressure calibration possibility
- Standard with 1 mm pressure signal format
- Display height 23 mm
- Change level settings via the battery
- Display units: MPa, Pa, kPa, mbar, bar, MPa, MPa

Options

- Two independent relays with external power supply
- MAM 900-BAT pressure version with 0, 1 or 2 psi wetted part
- Standard stainless-steel parts
