

Kari cable suspended float switches are capable of up to four switching levels in a single float, and offer 25 different configurations – including some with built-in systems. That means you can replace up to four single level float switches with one 4-point level switch. Kari offers high chemical compatibility and durable components built to resist any other.

Features

- Up to 4 switching levels
- Optional built-in systems
- 25 configurations
- Mercury and Lead free
- High-chemical compatibility
- Proven reliability in operation
- Cost effective

Quick Specs

- Max Voltage 250VAC or DC
- Temperature Up to 125°F
- Float Material: Polypropylene
- Cable Material: PVC (standard), Polypropylene, Butane, Teflon®
- IP67, NEMA 4
- CE, CSA-General Purpose
