

INTELLIGENT PRESSURE AND LEVEL TRANSMITTERS

For all industries

Series 4000

- All stainless steels
- Self-tuning smart compensation of zero
- Remote zero and output
- Accuracy $\pm 0.075\%$
- Zero auto trim
- Integral output with inherent self protection
- Remote manual compensation and trim
- Integral transmitter compensation
- Accuracy accuracy $\pm 0.01\%$
- Integral transmitter hardware
- All stainless steels, Hastelloy C22000
- Integral zero trimmer

Description

Series 4000 is available in both integral transmitter and transmitter with external display. The transmitter can be configured to measure any liquid or gas pressure in a wide range. The built-in automatic trimmer can auto-trim to the set point. Programmable display with inherent self-protection and output protection is available for easy-to-use light or heavy-duty applications. It offers a wide range of output and compensation options. It features a wide range of options for high-precision and high-accuracy applications.
