

INTELLIGENT PRESSURE AND LEVEL TRANSMITTERS

For all industries

Series 4000

- All stainless steels
- Built-in pressure sensor
- Compensation of zero
- Control output and output
- Accuracy $\pm 0.1\%$
- Low power on
- Integral output with
- Current and voltage
- Output channel
- Compensation and pressure
- Integral transmitter
- Compensation
- Accuracy accuracy $\pm 0.1\%$
- Integral transmitter channel
- All stainless steels, Hastelloy C22000
- Integral output channel

Description

Series 4000 is a complete transmitter with pressure and level transmitter and electronic housing. The transmitter can be used in any way and in any industry. The transmitter has built-in pressure sensor and compensation of zero. The transmitter has a control output and output. The transmitter has a current and voltage output. The transmitter has an integral output channel. The transmitter has an integral transmitter channel. The transmitter has an integral transmitter channel. The transmitter has an integral transmitter channel.
