HART

Description

The Series 2000 is a complete range of 'intelligent' pressure and level transmitters with digital display and adjustment by three pushbuttons. The pushbuttons are used to set Zero and Span. No calculators or other equipment for calibration.

The display shows user-friendly readings or values of other engineering units. Also user-friendly programming is possible with only operation. Process temperatures up to 150 degrees C and damping times can be adjusted from 0 to 30 secs. Also a 4-20 mA output with HART® protocol is optional.

The Series 2000 is **fully interchangeable and reproducible**. Over 10 different process connections are available including many from well-known makes. Others
