

# PRESSURE- AND LEVEL TRANSMITTERS

For all industries

## Series 8000

- COMPACT AND ROBUST
- STAINLESS STEEL HOUSING
- DIGITAL OUTPUT (HART)
- 2000 AND 5000 MODELS
- WITH INTERNAL FLUID FILL (WITH SUPPLEMENT)
- LOCAL VISUALIZATION
- LOCAL INDICATOR (OPTION)
- [APPLY TO SERIES 7000](#)

### Description

The Series 8000 is a complete line of 4-20 mA transmitters for pressure and level measurement. It is available in stainless steel.

The compact stainless steel housing is ideal for liquid applications and also for hazardous gas applications. The transmitter is fully temperature compensated. The range can be set on-site (2-point) or in the factory through the use of digital potentiometers. Electrical connection is via a plug interface. The series 8000 is available in several different sizes and with different mounting options.
