

## SUBMERSIBLE LEVEL TRANSMITTERS

With Capacitive Ceramic sensor

# HYDRO CER

**HAUT**   
HYDRO CER

- Accuracy 0.1% (Hydrocer T: 0.1%)
- Capacitive Ceramic sensor
- Perfect long term stability
- Temperature compensated

The Hydrocer transmitter provides fast and accurate level measurement in tanks & vessels with up to 10m depth.

The Hydrocer is built in a rugged stainless steel 316L body with a 1/2" NPT process connection. The Hydrocer is available in two versions: 0.1% accuracy and 0.5% accuracy.
