

# PRESSURE- AND LEVEL TRANSMITTERS

For all industries

## Series 8000

- COMPACT AND ROBUST
- STAINLESS STEEL HOUSING
- DIGITAL OUTPUT (HART)
- 20mA AND 4-20mA ANALOGUE
- WITH STAINLESS STEEL WETTED COMPONENTS
- LOCAL DISPLAY OPTION
- LOCAL INDICATOR OPTION
- APPROVED BY SILICONES

### Description

The Series 8000 is a complete line of 1/2" NPT stainless steel pressure and level transmitters for industrial applications.

The compact stainless steel housing is made of highly polished stainless steel for the most accurate pressure readings. The operating principle is pressure compensated. The range can be set on any 1/2" NPT stainless steel or 1/4" NPT stainless steel or 1/8" NPT stainless steel. The transmitter is available in a wide variety of configurations. The stainless steel housing is made of stainless steel and is suitable for use in any kind of industrial application.
